

Pullman™ Tables  
Design: Nienkämper

# nienkämper

**Pullman™ Tables**  
Design: Nienkämper

# nienkämper

A collection of tables offering functionality and a light aesthetic, the Pullman Tables are available in three sizes: side, coffee, and display size, which is lower and narrower than the coffee table size. The metal legs extend through the top and are flush with its surface, creating a unique design detail. Pullman Tables are appropriate for reception areas, executive lounges, and lounges in hospitality and institutional spaces. The display table can be used in hallways, windows and other open spaces to define space and display various items such as brochures and awards.

**Tops:**

Tops are constructed from 1" medium density fibreboard (MDF) that is covered in wood veneer. The Pullman Display tabletop is constructed from 1 1/2" MDF. All MDF used is certified by Scientific Certification Systems® as 100% recovered and recycled wood fibre made up of at least 60% post-industrial waste and the balance (40%) recovered fibre. In addition, Forest Stewardship Council certified cores and veneers are available. Tops are available in all standard Nienkämper veneers and stains. Refer to the Seating and Tables price list for a listing.

**Base:**

The base is made of tubular steel and is available in a brushed nickel, powder coat paint (silver or matte black) or polished chrome finish. Levellers are integrated into the base.

**Special Features:**

A Box Pattern is available on all tops and other veneer patterns can also be specified. Refer to Nienkämper's Seating and Tables price list for more information or visit our website at [www.nienkamper.com](http://www.nienkamper.com).
